Ballance supplies Invercargill school students with high-vis vests

High-vis vests mean safer travel for students at an Invercargill primary school thanks to Ballance Agri-Nutrients.

Tisbury Primary School, on the south east edge of Invercargill, is located on a notoriously busy stretch of road, with high volumes of traffic, especially trucks and other heavy vehicles, passing the school on a daily basis.

Ballance Agri-Nutrients, along with the Community Trust of Southland, have bought 100 bright yellow high-vis vests for all Tisbury Primary School students to ensure that they are safe while travelling to and from school.

Ballance Agri-Nutrients Invercargill Operations Manager Neil Miller says the company is delighted to be able to support the local school and ensure the safe travel of its students.

“During the winter months visibility can often be poor due to adverse weather conditions and shorter daylight hours. It is important that we do all we can to ensure our children are safe on the roads, especially as the school is located on such a busy stretch of road.”
